

S.No: 34	Exp. Name: <b>Write java program(s) that use collection framework classes. (LinkedList class)</b>	Date:2023-12-03
----------	-------------------------------------------------------------------------------------------------------	-----------------

### Aim:

Write a java program(s) that use collection framework classes.(LinkedList class)

### Source Code:

**LinkedList.java**

```
import java.util.*;
public class LinkedList{
    public static void main(String[] args) {
        Scanner sc = new Scanner(System.in);
        LinkedList<String> linkedList = new LinkedList<String>();
        System.out.println("No.Of Strings in LinkedList:");
        int num = sc.nextInt();
        sc.nextLine();
        for(int i=0;i<num;i++){
            System.out.println("Enter the String:");
            linkedList.add(sc.nextLine());
        }
        System.out.println("LinkedList:"+linkedList);
        System.out.println("The List is as follows:");
        Iterator<String> itr = linkedList.iterator();
        while(itr.hasNext()) {
            System.out.println(itr.next());
        }
    }
}
```

### **Execution Results** - All test cases have succeeded!

Test Case - 1
User Output
No.Of Strings in LinkedList: 3
Enter the String: Hi
Enter the String: Hello
Enter the String: World
LinkedList:[Hi, Hello, World]
The List is as follows:
Hi
Hello
World

Test Case - 2
User Output
No.Of Strings in LinkedList: 2
Enter the String: Human
Enter the String: Being
LinkedList:[Human, Being]

The List is as follows:
Human
Being
